

# MedSuperi Project

▶ A Complete EMR/EHR System

# Summary

- ▶ An electronic medical records system for Hospitals, Emergency Rooms and Clinics. The system uses the latest and best-of-breed technologies for hosting, cloud computing, programming and security, as well as adhering to all HIPAA requirements and focusing on user experience and ease of use.

# Focus

Compilation of various medical modules that perform Each module focuses on a specific part of the workflow:

- ▶ Patient Entry
- ▶ Scheduling
- ▶ Routine Exams
- ▶ Medical Prescriptions
- ▶ Specialized Exams
- ▶ Billing Management
- ▶ Queues by room or by priority§
- ▶ Administration

# Problem

- ▶ Affordable Care Act kicks in 2015
- ▶ HIPAA and ACA Compliance
- ▶ Complexities of Electronic Medical Records
- ▶ Current solutions do not deliver, are expensive and cluttered
- ▶ Learning curve is steep and user experience is low

# Solution

- ▶ Easy to use interface
- ▶ Clean and simple workflow
- ▶ Made for doctors and healthcare professionals
- ▶ Modular (use what you need)
- ▶ Works on any device (tablet, phone, desktop)
- ▶ Rich web interface with fast response
- ▶ Created from feedback

# There are major competitors

- ▶ eClinicalWorks (<http://www.eclinicalworks.com/> )
- ▶ McKesson (<http://www.mckesson.com/> )
- ▶ Cerner (<http://cerner.com/> )
- ▶ AllScripts (<http://www.allscripts.com/> )
- ▶ AthenaHealth (<http://www.athenahealth.com/> )

# Market Opportunities

- ▶ Though initially small, the MedSuperi Project will grow and become one of the biggest medical software providers in the United States, connecting medical needs to technical advances, as well as security and proficiency.
